mutual fund schemes. The portfolio may hold cash depending on the market condition. The fund manager can use Derivative instruments to protect the downside risk.

The portfolio duration will be managed dynamically according to the expected movement in interest rates. Liquidity conditions and other macro-economic factors affecting interest rates shall be taken into account for varying the portfolio duration. The Scheme may review the above pattern of investments based on views on interest rates and asset liability management needs.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master Circular for Mutual Funds on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Portfolio rebalancing due to short term defensive considerations:

	<p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. The Scheme may actively deviate from the stated asset allocation pattern outlined in the SID during extenuating circumstances. These instances may be beyond the control of the fund manager & the AMC and hence may require such deviations. Such changes in the investment pattern will be transitional in nature and will be undertaken as defensive considerations only in accordance with Para 1.14.1.2 of SEBI Master circular for Mutual Fund and as amended from time to time. Defensive considerations may be determined by the fund manager and /or AMC from time to time. In case of deviations on account of exogenous factors, the fund manager will endeavour to rebalance the Scheme within 30 calendar days from the date of such deviation. The intention being at all times to seek to protect the interests of the Unit holders."</p> <p><u>Portfolio rebalancing due to passive breaches:</u></p> <p>In case of passive deviation from the asset allocation pattern or various prudential limits prescribed under SEBI (Mutual funds) regulations, 1996 and circulars issued thereunder the AMC shall follow process specified in Para 2.9 of SEBI Master circular for Mutual Fund as amended from time to time. In line with the circular, in the event of deviation from the mandated asset allocation limits mentioned in the SID or the prudential limits due to passive breaches such as corporate action, substantial rise/ fall in the price of an underlying scrip, maturity of any underlying security, large redemptions, etc., the portfolio would be rebalanced within 30 business days from the date of deviation. Where the portfolio is not rebalanced within mandated timelines, justification in writing including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desired, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of the Scheme is not rebalanced within aforementioned mandated plus extended timelines AMC shall adhere to the requirements as laid down in the aforesaid SEBI circular. However, at all times, the portfolio will adhere to the overall investment objective of the scheme.</p>
<p>Investment Strategy</p>	<p>The Scheme follows an Active Investment Strategy.</p> <p>Interest rates have a cyclical movement whereas yields fall, bond prices rise, while the reverse is true in the case when interest rates rise. The investment objective of this scheme is to maximize risk adjusted returns to the investor through an active management of the portfolio, by elongating the duration of the portfolio in a falling interest rate scenario and reducing the duration at a time when interest rates are moving up. The fund will be actively churned to capture price appreciation and endeavor to minimize the negative movements in prices. While long term funds try to optimize returns in the long term, this fund will look to micro manage the portfolio and endeavor to optimize returns. Active calls on the shape of the yield curve (sovereign gilt curve or the corporate bond curve) and the spread between corresponding points of different yield curves (say 5y gilt versus 5y AAA corporate bond) will be taken to endeavor to maximize the returns to the investor.</p> <p>With the discretion to take aggressive interest rate/duration risk calls, this could mean investing the entire net assets in long dated Government securities and debt instruments (carrying relatively higher interest rate risk/duration risk), or on defensive considerations, entirely in money market instruments. Accordingly, the interest rate risk/duration risk of the scheme may change substantially depending upon the Fund's call.</p> <p>The Indian debt market is in a phase of rapid transformation with liquidity and investment opportunities arising in various debt segments along with the introduction of new instruments. The fund manager will try to allocate assets of the scheme between various fixed income securities with the objective of achieving optimal risk adjusted returns. After doing a thorough research on the general macroeconomic condition, political environment, systemic liquidity, inflationary</p>

	<p>expectations, corporate performance and other economic considerations the portfolio duration and credit exposures will be decided.</p> <p>For detailed derivatives strategy, please refer to the SID.</p>
Risk Profile of the Scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific Risk Factors are summarized below:</p> <p>The scheme carries risks associated with investing in debt and money market securities, derivatives, Foreign Securities, securitized debt, short selling, debt instruments having credit enhancements and securities lending.</p> <p>Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Trading volume may restrict liquidity. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme investments may be affected by currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments.</p> <p>Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, creation of segregated portfolio, etc.</p> <p>Investments in 'REIT' & 'InvIT' have risks associated with price-risk, credit risk, liquidity and marketability, re-investment risk and risk of lower than expected distributions.</p> <p>Please read the SID carefully for details on risk factors before investment.</p> <p>Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF): CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified open ended MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfil liquidity obligations under stress situation.</p> <p>Investors are requested to read detailed disclosure on investment of the schemes in the CDMDF as mentioned in relevant section of SID.</p>
Risk Mitigation strategies	<p>Interest rate risk is managed by a meticulous determination of the average maturity of the portfolio. Extensive analysis of macro economic conditions is done to form a view on future interest rates and to position the portfolio accordingly. Credit risk is managed by in-depth analysis of issuer (financial/operating performance) with the help of internal and external research. Liquidity risk is addressed by maintaining exposure to cash/cash equivalents and highly liquid instruments.</p> <p>The AMC endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed. The Scheme also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of</p>

	<p>assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.</p> <p>For more details, please refer SID.</p>											
Creation of Segregated Portfolio	<p>In case of credit event, the Scheme may create segregated portfolio of debt and money market instruments in terms of applicable SEBI regulations/ circulars.- For more details, kindly refer SID & SAI.</p>
