In case of passive deviation from the asset allocation pattern or various prudential limits prescribed under SEBI (Mutual funds) regulations, 1996 and circulars issued thereunder the AMC shall follow process specified in Para 2.9 of SEBI Master circular for Mutual Fund as amended from time to time. In line with the circular, in the event of deviation from the mandated asset allocation limits mentioned in the SID or the prudential limits due to passive breaches such as corporate action, substantial rise/ fall in the price of an underlying scrip, maturity of any underlying security, large redemptions, etc., the portfolio would be rebalanced within 30 business days from the date of deviation. Where the portfolio is not rebalanced within mandated timelines, justification in writing including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of the Scheme is not rebalanced within aforementioned mandated plus extended timelines AMC shall adhere to the

	<p>requirements as laid down in the aforesaid SEBI circular. However, at all times, the portfolio will adhere to the overall investment objective of the scheme</p>
Investment Strategy	<p>The scheme follows an active investment strategy.</p> <p>The net assets of the Scheme will be invested in money market instruments. The Scheme will seek to optimize the risk return proposition for the benefit of investors.</p> <p>The investment process will focus on macro-economic research, credit risk and liquidity management. The Scheme will maintain a judicious mix of short term and medium term instruments based on the mandates of the Scheme. As part of credit risk assessment, the Scheme will also apply its credit evaluation process besides taking guidance from ratings of rating agencies. In order to maintain liquidity, the Scheme will maintain a reasonable proportion of the Scheme's investments in relatively liquid investments.</p> <p>For derivatives strategy, please refer SID.</p>
Risk Profile of the Scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>The scheme carries risks associated with investing in money market instruments & debt instruments having credit enhancements.</p> <p>Investments in money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, creation of segregated portfolio, etc.</p> <p>Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF): CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified open ended MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI.</p> <p>Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfil liquidity obligations under stress situation.</p> <p>Investors are requested to read detailed disclosure on investment of the schemes in the CDMDF as mentioned in relevant section of SID & SAI.</p>
Risk Mitigation strategies	<p>Interest rate risk is managed by a meticulous determination of the modified duration of the portfolio. Extensive analysis of macro-economic conditions is done to form a view on future interest rates and to position the portfolio accordingly. Credit risk is managed by in-depth analysis of issuer (financial/operating performance) with the help of internal and external research. Liquidity risk is addressed by maintaining exposure to cash/cash equivalents and highly liquid instruments.</p> <p>For more details, please refer SID.</p>
Creation of Segregated Portfolio	<p>In case of credit event, the Scheme may create segregated portfolio of debt and money market instruments in terms of applicable SEBI regulations/ circulars</p>
