Fund Manager Views

- › Relative growth in large cap segment compared to mid / small cap has been weak, hence large caps have been underperforming repeatedly over last 3 years under various market scenarios.
- › Accordingly, the valuations in large caps are lucrative on relative basis. GST reform could be increased savings in the hands of consumers. The cumulative impact of lower tax rates, streamlined GST structure, accommodative monetary policy and a favorable monsoon is likely to benefit consumers across the board and provide a boost to consumption.
- › Fund historically has a tilt towards consumption theme with current exposure of more than 65%.
- › We remained focused on identifying long term themes and opportunities currently at play in the equity markets. We believe that moderated earnings and weak demand and global tension warrant caution. We are UW on banks and FMCG, metals and IT. While we are OW on Capital goods, NBFC, platforms, Retail, Pharma, and Healthcare Services.
